Introducing Castrol SmartControl,
our automated real-time condition
monitoring solution.

SMARTCONTROL 

THE SMARTER WAY TO CONTROL YOUR METAL WORKING FLUID MANAGEMENT.

CONTROL FREAKS WANTED

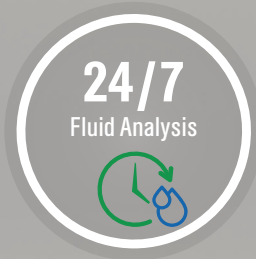

Castrol SmartControl is the new way for industrial Control Freaks like you to monitor and control your central system of metal working fluids automatically and in real-time.

To make this happen, our liquid engineers have joined forces with German control system experts Tiefenbach. As well as giving you instant data, our new SmartControl solution works in conjunction with Castrol XBB cutting fluids to optimise system stability and give you the efficiency, productivity and confidence that comes from control.

INTRODUCING CASTROL SMARTCONTROL

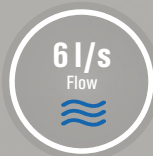

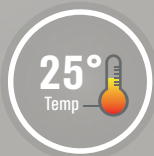

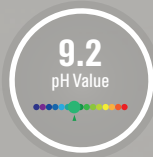

Castrol SmartControl gives you real-time measurement of your vital metal working fluid parameters and allows you to automate many of the tasks you currently do manually.

24/7 CONTROL AND CONFIDENCE

REAL-TIME MEASUREMENT OF:

- CONCENTRATION
- pH LEVEL
- CONDUCTIVITY
- TEMPERATURE
- VOLUME FLOW
- OPTIONAL NITRITE CONTENT

HOW YOU'LL BE MORE EFFICIENT WITH CASTROL SMARTCONTROL

IT'S MORE THAN JUST OIL. IT'S LIQUID ENGINEERING.

GET THE EFFICIENCY THAT COMES FROM CONTROL

Depending on how you want to work, Castrol SmartControl is available in two versions.

Both ensure you have all the data you need to maximise efficiencies but the two versions give you a choice of the level of automation you are ready to implement in your operation.

Castrol SmartControl BASIC

If you only want the benefits of real-time condition monitoring, Castrol SmartControl Basic will give you all of the information you need instantly and the data can easily be integrated into your existing IT solution.

Castrol SmartControl AUTO

The technology is more than just condition monitoring. The system can be connected with a control to automate your metal working fluid management, ensuring that your cutting fluids are always in optimum condition.

SIMPLE OPERATION AND MAINTENANCE

Installation of Castrol SmartControl is quick and simple. It has an automated self-baselining and cleaning cycle, that ensures reliability and accuracy and it requires minimal on-going operation and maintenance.

ARE YOU READY TO MAKE IT HAPPEN?

With Castrol SmartControl you can maximise the effectiveness and efficiency of your cutting fluid management and limit the associated HSSE risks.
