

Your chemical
management
partner for superior
performance

 **Castrol**
Complete

Castrol complete cms gives you sustainable cost savings Year after year

Castrol Complete cms is a rational solution to cost-effective sourcing across the full range of metalworking fluids, maintenance lubrication and process fluids in any manufacturing facility. Sustainable cost reductions and improved performance are delivered optimally managing all fluids and chemical operations. Castrol Complete cms provides savings by effective implementation of specialised applications knowledge, procurement, inventory control and Health, Safety and Environmental initiatives. For customers looking to optimise metalworking fluid and lubrication usage, reduce the complexity of tracking chemicals and willing to take a total cost-to-operation approach, Castrol Complete cms is the complete solution. Castrol brings a tangible value to your business by managing the complete chemical and fluid operation - from procurement to stock control, from environmental management to optimising system performance - all with the simple objective of sustainable documented cost savings year after year

Make Castrol complete cms your dedicated operations partner

- Comprehensive fluids supply and management
- Key Performance Indicator (KPI) driven performance on fixed fee or cost per unit basis
- Metalworking fluids and lubricants selection and initial set-up
- Dedicated on-site personnel
- **Castrol System^{RT}** – real time system monitoring
- Process and product optimisation
- Shutdown activity management
- Waste minimisation programs
- Troubleshooting and corrective action
- Operator training
- Health, Safety and Environmental (HSE) performance management

Comprehensive management of on-site fluid consumables with cost and related process savings

Castrol Systemcare features and benefits

- Metalworking fluids and lubricants selection means you get expert advice in selecting the most suitable products and making sure they are correctly employed
- Castrol SystemRT real time system monitoring advances system productivity, prolongs metalworking fluid life, reduces waste and improves performance
- Comprehensive management of metalworking fluids and lubricants includes procurement, integrated analysis, concentration monitoring and adjusting, and activity scheduling
- Troubleshooting with corrective actions help optimise process operations and minimise downtime
- Managing shutdown activities for efficient system changeover as well as planning and executing waste product disposal
- Performance reporting on the status of the system and actions taken to deliver operational improvements
- Advanced process and product optimisation delivers sustainable cost saving improvements
- Product supply management includes interface with product suppliers, purchasing, inventory handling, logistics and monitoring of consumption
- Waste program management to comply with applicable environmental standards
- Operator training to share knowledge and implement best practices
- Documentation of value in process savings as a tangible measure of Castrol's performance

Your chemical management partner
for sustainable performance

Your advantage

Castrol consistently delivers improved productivity and cost savings, to give customers worldwide the performance advantage they expect from a leader

One hundred years of world leadership in metalworking fluids and lubricants, provides Castrol with extensive applications expertise to bring you the advantage. A comprehensive range of best-in-class products and services, enhanced by unique technology platforms and enablers, allows our customers to sustain this advantage.

Castrol's commitment to Health, Safety, Security and Environmental (HSSE) performance

At Castrol, we make sure that all our employees, contractors and distributors are well informed, well trained, engaged and committed to the HSSE improvement process. We recognise that safe operations depend on competent people and an active HSSE culture. Castrol fully participates in hazard identification and risk assessments, assurance audits and reporting of HSSE results. We also help others to share in our understanding of this important subject. Castrol is uniquely capable of providing a wide range of services from training and technical advice to setting up standards for customer HSSE policy and practices.
